Portfolio:- <https://www.suryatomar.tech/>

SUMMARY

Full-Stack Developer with strong experience in building scalable, responsive web applications using React.js, Next.js, Node.js, Express, Django, and MongoDB. Skilled in REST API development, authentication, database design, and frontend performance optimization. Certified by Meta across frontend, backend, and database engineering. Seeking a full-stack developer internship or junior role to work on production-grade applications.

TECHNICAL SKILLS

Frontend

- HTML5, CSS3, JavaScript (ES6+)
- React.js, Redux Toolkit
- Next.js (SSR, Routing)
- Tailwind CSS, GSAP

Backend

- Node.js, Express.js
- Django, Django REST Framework
- Authentication (JWT, Role-based access)

Databases

- MongoDB, MySQL
- Data Modeling, Database Design

APIs & Tools

- REST APIs, Axios, JSON
- TMDB API, Gemini API
- Git, GitHub

Deployment

- Vercel, Netlify

PROJECTS

AI Resume Analyzer – Resume Evaluation Platform

- Architected a full-stack AI-driven resume analysis system to evaluate resumes against ATS heuristics and skill benchmarks.
- Designed and implemented RESTful APIs to process resume data, extract structured metadata, and compute weighted scoring models.
- Reduced resume evaluation time by ~65% through optimized request handling and asynchronous processing.
- Implemented skill gap detection algorithms to compare candidate profiles against role-specific requirements.
- Improved data retrieval performance by ~40% through MongoDB schema optimization and indexed queries.

Tech Stack: React.js, Node.js, Express.js, MongoDB

DevEvents – SEO-Optimized Event Discovery Platform

- Built a server-side rendered (SSR) web platform to maximize SEO visibility and reduce initial page load time.
- Implemented dynamic routing and metadata generation, improving search engine crawlability and indexing efficiency.
- Optimized rendering pipeline to achieve ~30% faster First Contentful Paint (FCP).
- Designed scalable database schemas to handle growing event data with minimal query overhead.

Tech Stack: Next.js, React, MongoDB, Tailwind CSS

Foodly – Role-Based Food Discovery & Management System

- Engineered a role-based authentication and authorization system supporting users and food partners using JWT.
- Developed secure REST APIs for food listings, user interactions, and partner dashboards.
- Optimized API response times by ~35% using efficient query patterns and middleware-level caching.
- Designed a reel-based discovery flow to improve content engagement and session duration.
- Implemented secure media handling and protected routes to prevent unauthorized access.

Tech Stack: Next.js, Node.js, Express.js, MongoDB, JWT, ImageKit

URL Shortener & Analytics Platform

- Designed and developed a high-performance URL shortening service with persistent click analytics.
- Implemented QR code generation and tracking for shortened URLs.
- Reduced redirect latency by ~50% through optimized routing logic and indexed database lookups.
- Built an analytics dashboard to track clicks, timestamps, and historical usage patterns.
- Designed REST APIs to support scalable link creation and retrieval.

Tech Stack: Node.js, Express.js, MongoDB, HTML, CSS, JavaScript

CERTIFICATIONS

Meta Front-End Developer Professional Certificate (2024)

- Advanced React, JavaScript, UI/UX Design
- Built responsive, interactive web applications

Meta Back-End Developer Professional Certificate (2025)

- Django, APIs, SQL, Security Best Practices
- Built full-stack applications

Meta Database Engineer Professional Certificate (2025)

- MySQL, Data Modeling, Database Optimization

EDUCATION

Bachelor of Computer Applications (BCA)

Manipal University Jaipur | 2023 – 2026

Relevant Coursework:

Data Structures, Algorithms, Software Engineering, Database Management

ADDITIONAL INFORMATION

- Languages:** English (Fluent), Hindi (Native)
- Strengths:** Problem Solving, System Design, Clean Architecture
